

Growing Faith — NFC Bracelet Programming Spec

Updated: 2025-10-07 01:33 UTC

Chip: NTAG213 (NFC Type 2)

Locking: DO NOT LOCK (leave tags rewritable)

Record type: NDEF URL (single record)

Per-bracelet unique URLs (recommended):

Example: <https://YOUR-VERCEL-SUBDOMAIN/nfc/BRACELET-0001>

See CSV: `manufacturer_urls_100.csv` (columns: id, url)

iOS/Android behavior: tap to open browser. No app required.

Verification: After programming, test at least 3 bracelets:

- iPhone: tap → Safari opens correct URL
- Android: tap → Chrome opens correct URL

Notes:

- Program exactly the URL from CSV (case-sensitive).
- Use URI record type (not Text).
- No password protection. Do not set lock bits.
